## **DETAILED ACTION**

### ***Claim Objections***

Claim 1 is objected to because of the following informalities: In line 2, no antecedent basis could be found for "the tool". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,10,45 and 47 are rejected under 35 U.S.C. 102(b) as being anticipated by Bode 5,494,107.

Bode discloses a method usable with a well. Casing 14 is considered the tool and is run into the well and used to support the uncased interval as a casing. The casing is fixed to the tool by pumping a fixing agent into the annulus to fix the tool in place. As to claims 2 and 47, the fixing agent is cement. As to claim 10, the tool is run into the well and then the cement is pumped into the annulus. As to claim 45, the casing 14 is a tool. Balls 66 seal the bottom end of the tool.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 70, 72 and 73 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bode (described above).

Bode is considered to disclose all of the claimed features except for running a perforating gun through the cemented casing to perforate the well. It is common practice to run a perforator through a cased well and then fire the perforator to form perforations through the casing and cement to produce the well. It would have been considered obvious to run a perforator through the cased well of Bode for perforating since perforating of cased wells is commonly known. As to claim 72, balls 66 isolate the

bottom of the tool. As to claim 73, the cement is pumped into the uncased portion of the well.

***Allowable Subject Matter***

Claims 4-6,46,64 and 71 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 17-21,48-51,61-63,65-69 and 74-78 are allowed.

***Response to Arguments***

Applicant's arguments with respect to claims 1,2,10,45,47,70,72 and 73 have been considered but are moot in view of the new ground(s) of rejection.
